You can see [here](#) multimodal access to the site.

## **Important to remember**

**Cloakroom.** There is a cloakroom at your disposal at the venue, but it will not be guarded. The venue and the conference team cannot take responsibility for the items left in the cloakroom.

**Less paper, more trees.** We encourage the participants to use the electronic version of the agenda. A very limited number of copies of the agenda and other documents will be printed for the conference. If you must have a paper-printed copy, we encourage you to print your own, to avoid paper waste.

**Posters and other material.** We will have a corner at your disposal for your posters. For all other printed material, please leave them on the registration table, where they can be displayed for all participants.

**Interaction and social media.** We are planning to use Slido during the conference. Slido is an application which enables interactive exchanges between the audience and the organisers during the events. During the conference, we will be using Slido to get your opinion on several issues. If you want to share your opinions on the day, you will have to participate to the Slido event that we will set up for the occasion. It is easy: you can either download the application or go to the Slido website and enter the event code (to be communicated on the day). You can find more information [here](#).

Think about using the hashtags #FutureofSoils and #soilSDGs when you use social media about the event.
